Tables

Create a table that has four columns and 6 rows. This table should have a center cell that spans 4 rows and 2 columns. The cell in the center of the table must have an image graphic (not a background) centered in it and it may also have text.   You may place some **image graphics, text, or color** in the cells around the edge. Please - Make it attractive. Be sure to pay attention to the size (no specific size required of the cell) this project must use the cellspacing and cellpadding attributes (with a value of 5 or greater) along with the rowspan and columnspan attributes. Read the Table chapter carefully! Remember to play with the attributes of cells other than the one you are trying to make fit.

See example below.

	Image graphic must be here & centered		

Part 2 of 2

Format a page with a table so that your navbar is on the left-hand side of the document, your logo and title are across the top and the text is to the lower right.

Logo and business name here	
navbar	text
